Education

Kalinga Institute Of Industrial Technology July 2023 - July 2027
B.Tech, Computer Science; CGPA: 8.73 / 10.00 *Bhubaneswar, Odisha*

- **Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming, Operating Systems, DBMS, Computer Networks, Machine Learning, Cloud Computing.

Experience

AntBox February 2026 - Present
Software Developer Intern

- Built backend features including a geocoded delivery-radius service-area gate, one-click email unsubscribe, order-link escalation flow, and in-app account deletion using **Python**/**FastAPI** and **PostgreSQL**.
- Implemented end-to-end observability with **Sentry** error tracking, **OpenTelemetry** distributed tracing, and **PostHog** analytics for runtime user metrics.
- Built and shipped responsive customer-facing pages for the company marketing website using **Next.js**, **TypeScript**, and **Tailwind CSS**.

Projects

Zev: AI Chatbot | *Next.js 16, React 19, Prisma, Postgres, Groq* Github | Live Site

- Built a full-stack AI chatbot on **Next.js 16** and **React 19** with response streaming from **Groq**, cited web search via **Tavily**, and auto-generated chat titles.
- Implemented **Google OAuth** via **Auth.js** (NextAuth v5) with per-user chat history on **Neon Postgres** through **Prisma**, plus a guest mode.
- Engineered abuse and cost controls - per-user rate limiting and daily token budgets in **Postgres** - backed by an automated **Vitest** test suite.

OpenStay: Vacation Rental Platform | *Node.js, Express, MongoDB, Passport.js* Github | Live Site

- Built a full-stack vacation rental platform with **Node.js**, **Express**, and **MongoDB Atlas** (Mongoose) supporting property CRUD, search/category filtering, and **star-based reviews** with image uploads via **Multer** and **Cloudinary**.
- Implemented secure authentication with **Passport.js** (local strategy), **express-session** + **connect-mongo** session store, **Joi** server-side validation, and a self-service password-change flow.
- Secured the app with **Helmet** HTTP headers, **express-rate-limit** on sensitive endpoints, file upload validation, and integrated the **Photon API** for geocoding addresses to **GeoJSON** coordinates.

BiteSnake: Online Snake Game | *JavaScript, Canvas API, Firebase Firestore* Github | Live Site

- Built a browser-based Snake game using **JavaScript** and **HTML Canvas** with smooth animations, particle effects, and keyboard/swipe controls, designed with **modular OOP architecture**.
- Integrated **Firebase Firestore** to support real-time online leaderboards across difficulty modes and deployed on **Vercel**.

Skills

Languages: C, C++, Java, Python, SQL.
Databases: MySQL, PostgreSQL, MongoDB.
Core: DSA, OOP, DBMS, Machine Learning, Cloud Computing, Operating System, Computer Networks.
Web Development: HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express.js, Bootstrap, Tailwind CSS.
Tools/Technologies: Git, GitHub, GitHub Actions, Docker, FastAPI, Prisma, VS Code, Vercel, Firebase, Supabase, REST APIs.

Achievements & Certifications

- Solved **425+ Problems** on LeetCode & **150+** on Geeks for Geeks, strengthening **DSA** and problem-solving.
- Achieved Codeforces **Pupil** rank (Max Rating **1249**) and CodeChef rating of **1429**.
- Achieved a **rating of 1552** in LeetCode weekly and biweekly contests.
- Completed the **Google Cloud Fundamentals: Core Infrastructure** certification by Google Cloud on Coursera.
